Figure 1: A 10x10 grid of 100 cells representing a 100-year timeline. The grid is organized into 10 rows and 10 columns. The columns are labeled with years: 1900, 1910, 1920, 1930, 1940, 1950, 1960, 1970, 1980, 1990. The rows are labeled with decades: 1900s, 1910s, 1920s, 1930s, 1940s, 1950s, 1960s, 1970s, 1980s, 1990s. Each cell contains a year. The grid is divided into four quadrants by a vertical line between 1950 and 1960 and a horizontal line between 1950s and 1960s. The top-left quadrant (1900s-1940s, 1900-1950) is shaded light blue. The top-right quadrant (1900s-1940s, 1960-1990) is shaded light green. The bottom-left quadrant (1950s-1990s, 1900-1950) is shaded light orange. The bottom-right quadrant (1950s-1990s, 1960-1990) is shaded light purple. The grid is used to illustrate the concept of a 100-year timeline and the impact of a 10-year shift in the timeline.
